Please change your password after first login: click your name (bottom left) > Sign out > use 'Forgot password' to set a new one.

What is FlowDesk?

FlowDesk connects your Shift Espresso WhatsApp number to a smart business dashboard. When customers message you on WhatsApp, FlowDesk:

- Answers common questions automatically (AI assistant)
- Takes pickup/takeaway coffee orders
- Manages your loyalty stamp card programme
- Lets you send promotions to all customers
- Keeps a record of every customer conversation

You and your staff manage everything from one screen -- on a tablet, phone, or computer.

Your Dashboard

When you log in, you'll see these sections in the sidebar:

Inbox

This is your WhatsApp message centre. Every customer message appears here. You can:

- Read and reply to customer messages
- See the customer's loyalty stamp card (tap the contact button on tablet)
- Add a stamp when they buy coffee
- Redeem a free coffee when they've earned one

The AI bot handles most messages automatically. If a customer asks to speak to staff, the bot pauses and you can reply manually.

Contacts

Your complete customer list. Every person who messages your WhatsApp is automatically added here. You can:

- Search for customers by name or phone
- See who has opted out of campaigns
- Delete contacts if needed

Campaigns

Send promotional WhatsApp messages to all your customers at once. Perfect for:

- New menu announcements
- Weekly specials
- Holiday promotions

How to send a campaign: tap New Campaign > type your message > Preview > Send to All Customers. Customers who replied STOP are automatically excluded.

Orders

When customers order coffee via WhatsApp, their orders appear here. You can:

- See new orders (marked 'pending')
- Tap 'Received' to confirm an order
- Tap '+1 Stamp' to add a loyalty stamp (only once per order)
- Toggle 'Accepting Orders' off when the kitchen is closed

All orders are pickup/takeaway only.

Loyalty (Coffee Stamp Cards)

Your digital loyalty programme. Every coffee earns a stamp. 10 stamps = 1 free coffee.

- See all loyalty members with their stamp count
- Search for a customer by name or phone
- Tap '+1 Stamp' to add a stamp
- Tap 'Redeem Free Coffee' when a customer claims their free coffee
- Tap 'History' to see every stamp date (for disputes)
- Tap 'Adjust' to manually correct stamps if needed

Free coffees accumulate and never expire. If staff is busy, just keep stamping -- free coffees are banked automatically.

Daily Report

A summary of each day's activity: orders, revenue, new customers, messages, and loyalty activity. Use the arrows to look at previous days.

Bookings

If you offer appointment bookings, customers can book via a shareable link. Bookings appear here with date, time, and status.

Schedule

A calendar view of all bookings. Switch between daily, grid, and monthly views.

QR Codes

Your printable QR codes for the counter. Two main ones:

- Loyalty QR -- customers scan to join the stamp card programme
- Order QR -- customers scan to order coffee on WhatsApp

Daily Staff Workflow

A typical day using FlowDesk:

Morning: Open FlowDesk on the tablet. Check the Inbox for any overnight messages. Check Orders for any pending orders.

Customer buys coffee: Open their conversation in Inbox (or find the order in Orders). Tap '+1 Stamp'. Customer gets a WhatsApp notification.

Customer earns free coffee: When they hit 10 stamps, FlowDesk tells them automatically. When they come to collect, tap 'Redeem Free Coffee'.

New customer joins loyalty: Customer scans the counter QR code. The bot asks for their name and email, then creates their stamp card automatically.

Customer orders via WhatsApp: Order appears in the Orders section. Tap 'Received' to confirm. Tap '+1 Stamp' to add the loyalty stamp.

Send a promotion: Go to Campaigns > New Campaign > type your message > Preview > Send. All customers receive it except opted-out ones.

End of day: Check the Daily Report for today's stats.

Important Things to Know

- **The AI bot runs 24/7.** It answers customer questions, helps with orders, and handles loyalty signups automatically. You don't need to be online for it to work.
- **STOP means opt out of campaigns only.** If a customer replies STOP, they won't get promotional messages, but they can still order, chat, and earn stamps.
- **Staff can always reply manually.** Even if the bot is handling a conversation, you can jump in from the Inbox. The bot pauses when you do.
- **Free coffees never disappear.** If a customer forgets to claim, it stays in their balance until they redeem.
- **Each order can only be stamped once.** The button changes to 'Stamped' after you tap it.
- **WhatsApp orders are pickup/takeaway only.** No dine-in orders through WhatsApp.
- **Data is backed up every night automatically.** You don't need to do anything.
