

Shift Espresso

FlowDesk User Guide

A quick reference for your team to manage WhatsApp messaging, orders, loyalty stamps, bookings, and more.

Prepared for Daniel and staff
June 2026

What's Inside

1. Getting Started - Logging in and navigating FlowDesk
2. Dashboard - Your at-a-glance overview
3. Inbox - Chatting with customers on WhatsApp
4. Contacts - Managing your customer list
5. Campaigns - Sending WhatsApp messages to groups
6. Orders - Managing WhatsApp orders
7. Daily Report - Tracking your daily business activity
8. Bookings - Customer appointment bookings
9. Schedule - Viewing your daily/weekly/monthly calendar
10. QR Codes - Creating trackable QR codes
11. Loyalty (Coffee Stamp Cards) - Customer loyalty stamps
12. Quick Reference - Common tasks at a glance

1. Getting Started

FlowDesk is your all-in-one WhatsApp business platform. Everything your team needs to manage customer messaging, orders, loyalty, and bookings is in one place.

Logging In

Open your browser and go to **flowdesk.simplytranscriptions.co.za**. Sign in with your account email and password. You'll land on your Dashboard.

Navigation

The sidebar on the left is your main menu. Click any item to switch pages. On mobile, tap the menu icon (three lines) at the top to open the sidebar.

Your menu items: Dashboard, Inbox, Contacts, Campaigns, Orders, Daily Report, Bookings, Schedule, QR Codes, Loyalty.

Switching Workspaces

If you see a workspace switcher near the top of the sidebar, you can switch between different business accounts. Make sure you're in the **Shift Espresso** workspace.

2. Dashboard

Your dashboard gives you a quick snapshot of your business.

What you'll see:

- **Contacts** - Total number of customers in your system
- **Campaigns Sent** - How many WhatsApp campaigns you've sent
- **Inbox** - Quick link to open your messages
- **Quick Navigation** - Tap any tile (Inbox, Orders, Contacts, Loyalty Cards, Bookings, QR Codes) to jump straight there

3. Inbox

This is where you read and reply to customer WhatsApp messages.

Layout

The Inbox has three columns:

- **Left:** List of conversations. Search or filter by All, Unread, Open, or Closed.
- **Middle:** The chat thread. Type your reply at the bottom and press Send.
- **Right:** Customer details panel - name, phone, tags, notes, and their loyalty stamp card.

Replying to Customers

Click on a conversation, type your message in the text box at the bottom, and click Send (or press Enter). Your message is sent via WhatsApp instantly.

Loyalty Stamps in Inbox

In the right panel, you'll see the customer's stamp card. Click **Log Purchase (+1 Stamp)** each time they buy a coffee. The customer automatically receives a WhatsApp confirmation of their new stamp. On the 10th stamp, they get a free coffee notification.

TIP: You don't need to go to the Loyalty page to add stamps. Just do it right from the Inbox while chatting.

Bot Handoff

If the AI bot is handling a conversation and you want to take over, click the pause/resume button. When paused, the bot won't auto-reply and you can chat manually. Resume when you're done.

4. Contacts

Your complete customer list. Every person who messages you on WhatsApp is automatically added here.

Adding Contacts

- **One at a time:** Click 'Add Contact', fill in name and phone number, and save.
- **Bulk import:** Click 'Import CSV'. Prepare a spreadsheet with columns for name, phone, email (optional), and tags (optional). Save as CSV and upload.

Managing Contacts

- Search by name or phone number using the search bar
- Filter by status: Active or Opted Out
- Click a contact to edit their details or add tags
- Tags help you organise customers (e.g. 'regular', 'vip', 'new')

TIP: When sending campaigns, you can target specific tags. So tagging customers makes your messages more relevant.

5. Campaigns

Send WhatsApp messages to multiple customers at once. Great for promotions, menu updates, loyalty nudges, and more.

Creating a Campaign

1. Click **New Campaign**.
2. Choose a method: pick from a pre-built template, use AI to generate a message, or write your own.
3. Select your audience: all contacts, or filter by tag.
4. Preview the message on the WhatsApp phone mockup.
5. Schedule for later or send immediately.

Tracking Results

After sending, you can see how many messages were sent, delivered, and read. Failed messages are also tracked so you know if any numbers are invalid.

TIP: Don't send too many campaigns too frequently. One or two per week is a good pace. Customers can opt out if they feel spammed.

6. Orders

Customers can place orders via WhatsApp. Those orders appear here for you to manage.

Viewing Orders

Orders are shown as cards with customer name, items ordered, total amount, and status. Use the filter buttons (All, New, Confirmed) to find what you need.

Processing Orders

- **New orders** (pending) have two buttons: **Received** (confirm it) or **Cancel**.
- Click **Received** when you acknowledge the order.
- Each order shows whether it's **Pickup** (with time or ASAP) or **Dine-in** (with table number).
- Customer notes are shown in italics if provided.

Order Settings

Use the **Accepting Orders** toggle to pause orders (e.g. when the kitchen is closed). When paused, customers get your custom pause message. Click **Settings** to edit that message.

Stats at the Top

Three cards show: new orders waiting, today's total orders, and total value of unpaid orders.

7. Daily Report

A summary of each day's business activity. Use the arrows to navigate between dates.

What's Included

- **New clients** added that day
- **Total orders** and revenue
- **Messages** sent and received
- **Order breakdown:** confirmed, pending, cancelled, and revenue
- **Loyalty activity:** new enrolments, stamps earned, free coffees redeemed
- **Conversations:** new chats and ones needing your attention

Auto-Send

You can set up the daily report to be automatically sent to you (or a manager) on WhatsApp every day. Configure the recipient phone number and send time in the settings.

8. Bookings

Let customers book appointments via a shareable link.

Setting Up Booking Pages

1. Click **New Booking Page**.
2. Choose from 20+ industry templates or create from scratch.
3. Set your available time slots, services, and providers.
4. Copy the booking link and share it with customers (via WhatsApp, QR code, social media, etc.).

Managing Bookings

Switch between tabs: **Booking Pages** (your setup), **Upcoming Bookings** (what's coming), and **All Bookings** (full history).

Each booking shows: customer name, time, provider, and status. You can mark bookings as completed or cancel them.

9. Schedule

A calendar view of all your bookings and appointments.

Three Views

- **Daily:** Timeline view showing the day's appointments in time blocks. Stats at the top (total, confirmed, completed, cancelled).
- **Grid:** Hourly columns per provider/staff member. A red line shows the current time.
- **Monthly:** Full calendar with dots indicating bookings. Click a day to drill down.

Use the filter pills at the top to show a specific provider's appointments, or 'All' to see everything.

10. QR Codes

Create trackable QR codes for your shop - counter cards, table tents, window posters, and more.

Creating a QR Code

1. Click **Create QR Code**.
2. Choose the type: URL, WhatsApp (opens a pre-filled chat), form, booking link, or campaign.
3. Give it a name (e.g. 'Counter Display QR') and set the target.
4. Download the QR image and print it.

Your Current QR Codes

- **Counter Display QR:** Placed at the counter. When scanned, opens WhatsApp with a message to join the loyalty programme. The bot then asks for their name and email, and enrolls them.
- **Table Tent QR:** Placed on tables for dine-in ordering via WhatsApp.
- **Window Poster QR:** For passers-by to start a WhatsApp chat.

Tracking

Each QR code tracks how many times it was scanned and how many of those turned into conversations (conversions).

11. Loyalty (Coffee Stamp Cards)

Your digital stamp card system. Every coffee earns a stamp. 10 stamps = 1 free coffee.

How Customers Join

Customers scan the **Counter Display QR code** at your counter. This opens WhatsApp with a pre-filled message about joining the loyalty programme. The bot asks for their name and email, then creates their stamp card automatically.

You can also add members manually by clicking **Add Member** on the Loyalty page.

Adding Stamps

The easiest way: open the customer's conversation in the **Inbox** and click **Log Purchase (+1 Stamp)** in the right panel. Each stamp triggers an automatic WhatsApp message to the customer confirming their new stamp count.

Free Coffee (10th Stamp)

When a customer reaches 10 stamps, they automatically get a WhatsApp message congratulating them on earning a free coffee. The stamp count resets and they start collecting again.

The Loyalty Page

Shows all your stamp card members with:

- Visual stamp dots (filled = earned, empty = remaining)
- Progress count (e.g. 7/10)
- Alert when close to free coffee (8+ stamps)
- Total free coffees earned per member

Stats at the top: total members, free coffees earned across all members, and total active stamps.

12. Quick Reference

Common tasks at a glance:

Task	Where to Go	What to Do
Reply to a customer	Inbox	Click conversation, type message, send
Add a coffee stamp	Inbox > right panel	Click 'Log Purchase (+1 Stamp)'
Check new orders	Orders	Look at 'New' filter, click Received or Cancel
Pause orders	Orders	Toggle 'Accepting Orders' off
Send a promo message	Campaigns	New Campaign > choose template > select audience > send
Add a new customer	Contacts	Click 'Add Contact', fill in details
Import many customers	Contacts	Click 'Import CSV', upload spreadsheet
Create a QR code	QR Codes	Click 'Create QR Code', choose type
Add loyalty member	Loyalty	Click 'Add Member' or have them scan counter QR
Check today's stats	Daily Report	View the current day's summary
View appointments	Schedule	Switch between Daily, Grid, or Monthly view
Set up booking page	Bookings	New Booking Page > configure > share link

Need Help?

If you get stuck, message us on the same WhatsApp thread where you communicate with your FlowDesk support team. We're happy to help!
